IN THE CLAIMS:

Please amend claim 1 and add new claim 15 as follows:

1. (Currently Amended) A handle for attaching to a trigger operated hand tool wherein the handle includes:

a shaft adapted so as to be attachable at one end thereof to the hand tool;

a hand grip located at the other end of the shaft;

a trigger activator positioned near the hand grip capable of being operatively connected to the trigger associated with the hand tool, wherein said trigger activator controls the trigger lever to operate the trigger associated with the hand tool;

the hand grip is angled with respect to the longitudinal axis of the shaft to allow the handle to be easily gripped by a person's hand;

wherein the hand grip includes a second hand grip positioned on the shaft at a point intermediate to the two ends of the shaft, wherein the second hand grip extends radially from the shaft and is positionable about and along the longitudinal axis of the shaft, wherein said hand grip, said trigger activator and said second hand grip are the sole user engagement points of said handle.
